

TWO TRUTHS & ONE LIE!

Use your math skills to determine which of the three statements below is a dirty lie! Explain how you made your decision.

(1) Based on the graph, the constant rate of change is \$6.25 for every hour worked.

(2) Based on the graph, it would take more than 80 hours of work to earn \$500.00

(3) The linear relationship can be modeled using the function:

$$y = 6.25x$$

My Answer: _____

Key: 2
