

Name: _____

HAPPY CHEESEBURGER DAY!

Cheeseburger Day, celebrated on September 18th, is a day dedicated to the classic American favorite, the cheeseburger, honoring this beloved dish known for its juicy beef patty topped with melting cheese and often garnished with lettuce, tomatoes, pickles, and onions.

Directions: Use your math skills to find the value of each icon and the '?' in the puzzle below.

$$\text{burger} + \text{burger} = 6$$

$$\text{fries} + \text{burger} = 7$$

$$\text{fries} - \text{burger} = \text{drink}$$

$$\text{burger} + \text{fries} + \text{drink} = ?$$

My Answer: ? = _____

Answer Key:

Cheeseburger=3

Fries=4

Soft Drink=1

?=8

Fun Fact: The origin of adding cheese to a burger is widely claimed but not definitively known, with one popular story dating back to the 1920s. It's said that a young chef named Lionel Sternberger, while working at his father's sandwich shop in Pasadena, California, decided on a whim to add a slice of cheese to a cooking hamburger. This simple addition created a whole new dimension of flavor and texture, giving rise to the cheeseburger we know and love today.
