

Name: _____

CHOCOLATE CHIP DAY

Chocolate Chip Day, celebrated on May 15th, is a sweet celebration dedicated to the beloved chocolate chip, a simple yet delightful ingredient that has become a staple in many desserts, from classic chocolate chip cookies to pancakes and muffins.

Directions: Use your math skills to find the value of each icon and the '?' in the puzzle below.

$$\text{Cookie} + \text{Cookie} + \text{Cookie} = 12$$

$$\text{Cookie} - \text{Chocolate Bar} = 1$$

$$\text{Chocolate Bar} + \text{Chocolate Bar} = \text{Cakes}$$

$$\text{Cookie} + \text{Chocolate Bar} + \text{Cakes} = ?$$

My Answer: ? = _____

Answer Key:

Cookie=4

Chocolate Bar=3

Brownies=6

?=13

Fun Fact: Chocolate chips were invented in 1937 by Ruth Graves Wakefield, the owner of the Toll House Inn in Massachusetts, who chopped up a bar of semi-sweet chocolate and added the chunks to her cookie dough, creating the world's first chocolate chip cookie. This accidental invention quickly became a sensation, leading to the mass production of chocolate chips as we know them today.
