--	--	---	---

 **I Think...** **I Notice...** **I Wonder...**

I Think:

I Notice:

I Wonder:

Key:

One slice of cake costs \$4.95

Slices are less expensive if you purchase a full cake (\$3.75 each)

Unicorn Cupcakes probably cost \$3.77 each.

The Sparkle Cake probably costs \$64.50.

Can you be sure???

Engaging in *think-notice-wonder* writing activities at the start of a math class is a great way to ignite student thinking, spark creativity, and build anticipation.

Even if students are not directly engaged in mathematical problem-solving, their curiosity and interest will carry on throughout the day's lesson.

Be mindful that your kids will need some time to get used to these kinds of activities, but after a week or so, you'll be pleasantly surprised by the spike in engagement, boost in student enthusiasm and high quality of responses!
