

Name: _____

CORN ON THE COB DAY!

Corn on the Cob Day, celebrated on June 11th, is a summertime favorite where people enjoy the simple pleasure of eating freshly cooked corn on the cob, often seasoned with butter, salt, and other condiments, celebrating this staple of summer barbecues and picnics.

Directions: Use your math skills to find the value of each icon and the '?' in the puzzle below.

$$\text{Corn} + \text{Farmer} + \text{Corn} = 36$$

$$\text{Salt} \times \text{Butter} = 12$$

$$\text{Corn} \div \text{Salt} = 2$$

$$\text{Farmer} = \text{Corn}$$

$$\text{Corn} - \text{Butter} + \text{Salt} = ?$$

My Answer: ? = _____

Answer Key:

Corn=12

Farmer=12

Butter=2

Salt=6

?=16

Fun Fact: Corn on the cob is one of the oldest forms of consuming corn, dating back thousands of years. Native Americans introduced corn (maize) to European settlers, and it quickly became a staple food. Corn on the cob, in its simplest form, is just cooked maize, often boiled or grilled. The naturally sweet and juicy kernels make it a favorite during the summer, especially when cooked on the grill to bring out its unique flavor. This method of enjoying corn has remained largely unchanged over centuries, highlighting its enduring popularity.
