

Name: \_\_\_\_\_

### Finding Perimeter and Area of Irregular Rectangular Shapes

**Directions:** Find the perimeter and the area of each irregular rectangular shape below. Be sure to express perimeter in terms of units and area in terms of square units.

P = \_\_\_\_\_ A = \_\_\_\_\_

P = \_\_\_\_\_ A = \_\_\_\_\_

P = \_\_\_\_\_ A = \_\_\_\_\_

P = \_\_\_\_\_ A = \_\_\_\_\_

P = \_\_\_\_\_ A = \_\_\_\_\_

P = \_\_\_\_\_ A = \_\_\_\_\_

## ANSWER KEY

1.)

$$P = \underline{58 \text{ units}} \quad A = \underline{164 \text{ sq. units}}$$

4.)

$$P = \underline{65 \text{ units}} \quad A = \underline{175 \text{ sq. units}}$$

2.)

$$P = \underline{76 \text{ units}} \quad A = \underline{333 \text{ sq. units}}$$

5.)

$$P = \underline{119 \text{ units}} \quad A = \underline{426 \text{ sq. units}}$$

3.)

$$P = \underline{66 \text{ units}} \quad A = \underline{197 \text{ sq. units}}$$

6.)

$$P = \underline{85 \text{ units}} \quad A = \underline{322 \text{ sq. units}}$$
