

Name: _____

HAPPY HALLOWEEN!

496 OZ

48 OZ

528 OZ

I Think... I Notice... I Wonder...

I Think:

I Notice:

I Wonder:

Key:

Potion weighs 16 oz

Jack-O-Lantern weighs 480 oz

Witch Hat weighs 32 oz

Ghost weighs nothing...or does it??

Engaging in *think-notice-wonder* writing activities at the start of a math class is a great way to ignite student thinking, spark creativity, and build anticipation.

Even if students are not directly engaged in mathematical problem-solving, their curiosity and interest will carry on throughout the day's lesson.

Be mindful that your kids will need some time to get used to these kinds of activities, but after a week or so, you'll be pleasantly surprised by the spike in engagement, boost in student enthusiasm and high quality of responses!
