

Name: _____

HAPPY HAMBURGER DAY!

Hamburger Day, celebrated on May 28th, is a mouth-watering celebration of one of the world's most popular and iconic fast foods, where people indulge in and experiment with various hamburger styles and toppings, from classic beef patties

Directions: Use your math skills to find the value of each icon and the '?' in the puzzle below.

$$\text{Hamburger} + \text{Hamburger} + \text{Hamburger} = 6$$

$$\text{Fries} - \text{Hamburger} = 8$$

$$\text{Fries} - \text{Bottle} = 4$$

$$\text{Hamburger} + \text{Fries} + \text{Bottle} = ?$$

My Answer: ? = _____

Answer Key:

Hamburger=2

French Fries=10

Ketchup=6

?=18

Fun Fact: Americans alone eat approximately 50 billion burgers each year, which equates to about three burgers per person per week. This staggering number underscores the hamburger's status as a staple in American cuisine, beloved for its versatility, convenience, and delicious taste, making it one of the most commonly consumed dishes across the nation.
