# IGUANA AWARENESS DAY!

Iguana Awareness Day, celebrated on September 8th, is a day dedicated to educating people about iguanas, their care requirements as pets, and the importance of protecting their natural habitats in the wild.

**Directions:** Use your math skills to find the value of each icon and the '?' in the puzzle below.

$$\text{Iguana} + \text{Iguana} = 12$$

$$\text{Beach} - \text{Iguana} = 4$$

$$\text{Beach} + \text{Eggs} = 18$$

$$\text{Iguana} + \text{Eggs} = ?$$

My Answer: ? = \_\_\_\_\_

Answer Key:

Green Iguana=6

Beach=10

Eggs=8

**?=14**

**Fun Fact:** Iguanas, especially the Green Iguana, are often found near water in the wild and can swim extremely well to escape predators, using powerful tail strokes. This ability to swim is a survival adaptation, as iguanas are primarily tree-dwelling but often need to cross bodies of water or escape into water to avoid danger.
