# Happy Nachos Day!

National Nachos Day, celebrated on November 6<sup>th</sup>, is a cheesy tribute to the beloved snack, where enthusiasts indulge in crispy tortilla chips generously topped with melted cheese, jalapeños, and other savory toppings, reveling in this Tex-Mex culinary delight.

**Directions:** Use your math skills to find the value of each icon and the '?' in the puzzle below.

$$\text{Nachos} + \text{Nachos} + \text{Nachos} = 12$$

$$10 - \text{Nachos} = \text{Jalapeño}$$

$$\text{Jalapeño} + \text{Cheese} = 9$$

$$\text{Nachos} + \text{Cheese} + \text{Jalapeño} = ?$$

My Answer: ? = \_\_\_\_\_

Answer Key:

Nachos Plate=4

Jalapeño=6

Cheese Block=3

**?=13**

**Fun Fact:** Nachos were invented by accident in 1943 by Ignacio "Nacho" Anaya, who creatively threw together leftover ingredients - tortillas and cheese - for a quick snack for military wives in Piedras Negras, Mexico, unknowingly creating a future worldwide snack sensation.
