# ST. PATRICK'S DAY MATH RIDDLE!

*In a far away land on the other side of the rainbow, there lives unicorns, centaurs, and leprechauns.*

*In total, there are 22 heads and 72 feet. If the number of unicorns is equal to the number of centaurs, how many unicorns, centaurs, and leprechauns live beyond the rainbow?*

(Hint: Leprechauns have only two legs)

**My Work:**

There are \_\_\_\_\_ unicorns.

There are \_\_\_\_\_ centaurs.

There are \_\_\_\_\_ leprechauns.

. **Key:**

. **7 unicorns**

. **7 centaurs**

. **8 leprechauns**
