

Name: _____

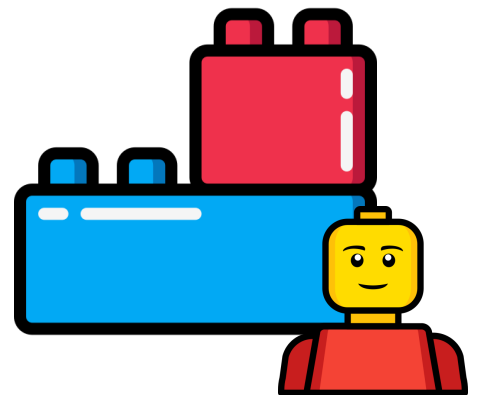

Measurement Word Problems (inches)

Lorenzo and Luigi are building objects using toy blocks.

1. Lorenzo builds a tower that is 9 inches tall. Luigi's tower is 3 inches taller than Lorenzo's tower. How tall is Luigi's tower?

2. Lorenzo builds a new tower that is 6 inches tall. Luigi also builds a new tower that is 7 inches tall. If they stack their towers on top of each other to create a Mega Tower, how many inches tall would the Mega Tower be?

3. Lorenzo decides to use red blocks to make a red snake and green blocks to make a green snake. If the green snake is 8 inches longer than the red snake, and the red snake is 2 inches long, how long is the green snake?

ANSWER KEY

- 1.) 8 inches
- 2.) 13 inches
- 3.) 10 inches
